

COVERS

BRIGHTEN YOUR DAY WITH A LITTLE SHADE

THE ORIGINAL
SNAP-N-LOCK
INSULATED PANEL™

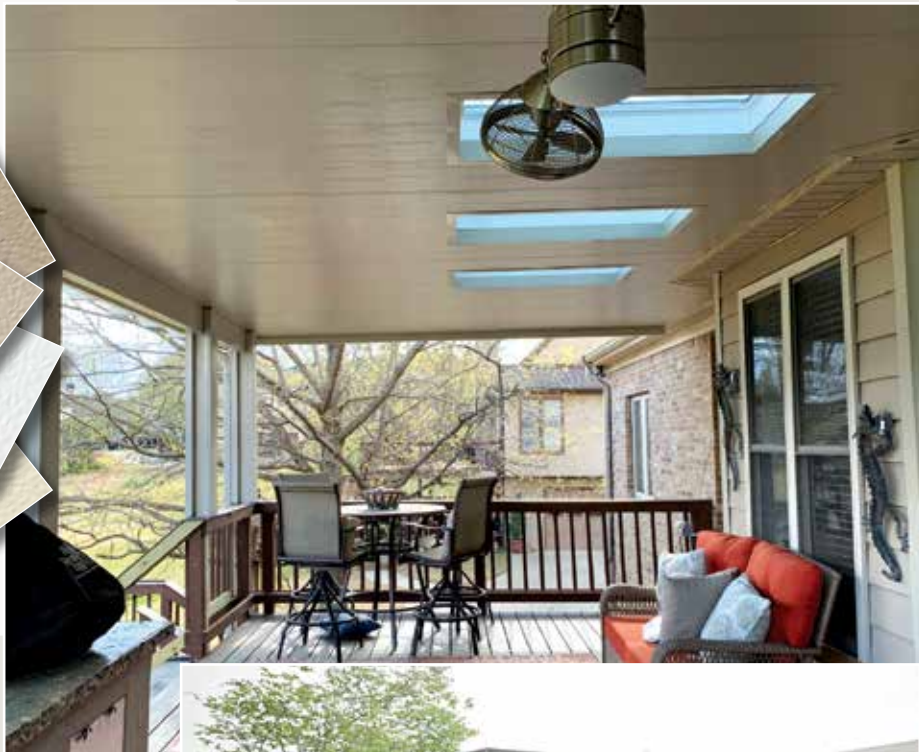

Whatever your reason for adding a cover to your home, choosing the right construction system is the first step. Structural aluminum covers install quickly, are more durable, require less maintenance, and can be easily converted to a room enclosure later. Choose from either insulated and non-insulated aluminum covers designed to suit your home and budget.

Our covers are available in 6 attractive colors; *Adobe, Sandstone, White, Ivory, Desert Sand, and Bronze*. These enamel finishes are baked onto the metal surface, making them virtually maintenance-free. You can also choose stucco or cedar embossed aluminum.

Best of all, most units can be installed in just one day.

Roll-Form pan systems are affordable and protect against inclement weather. Insulated panel systems offer additional strength and insulative features.

▲ With a durable, flat pan patio cover, you won't have to worry about the weather dampening outdoor activities like cookouts, parties or some well-deserved relaxation.

▲ Attaching a cover to the outside of a garage protects the garage entryway from the elements and shelters additional vehicles that the garage cannot accommodate. You can also do more projects inside the garage, without weather damage occurring to your car or truck.

▲ The HardTop. The Snap-N-Lock™ Insulated Panel provides homeowners relief from the beating sun while the PermaWood Shade Structure components enhance the entire patio area.

Insulated Covers can be fitted with internal fan beams intended to run hidden electrical wiring and mount light fixtures and fans.

PERMAWOOD

Aluminum Shade Structures by Structall

A PermaWood Shade Structure is an investment in beauty and value. Its lattice design with its sophisticated charm makes it a landscaping focal point for any home. All units are constructed of an embossed aluminum with a richly textured wood-grain finish for an authentic wood look. The long-term cost is less than wood, because **PermaWood** won't burn, attract termites, crack, peel, warp, rot or need constant repainting.

- Strong, long-lasting, low-maintenance aluminum
- Color-matching fasteners
- Attach to home or construct free-standing
- Lifetime limited warranty
- Heavy header beam construction
- Posts install with brackets fastened to a concrete slab or embedded in concrete footings
- Virtually maintenance free
- Custom designed and custom fit

ENJOY THE SOPHISTICATED CHARM OF A LATTICE COVER - RAIN, SHADE OR SHINE.

The Santa Fe and the HardTop combine the solid roof of the Snap-N-Lock™ Insulated Panel with beautiful lattice accents and exposed rafter tails.

THE ORIGINAL SNAP-N-LOCK INSULATED PANEL

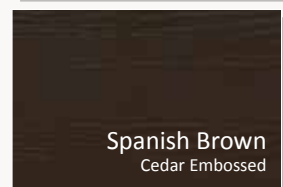

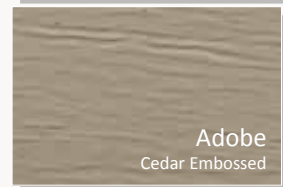

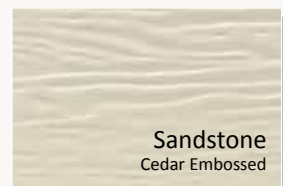

The Snap-N-Lock™ panel creates a structurally superior cover. The Panel's integrated insulation makes it perfect for reducing heat from the sun. Panel skins are available in paint matching White, Sandstone, Adobe, and Desert Sand.

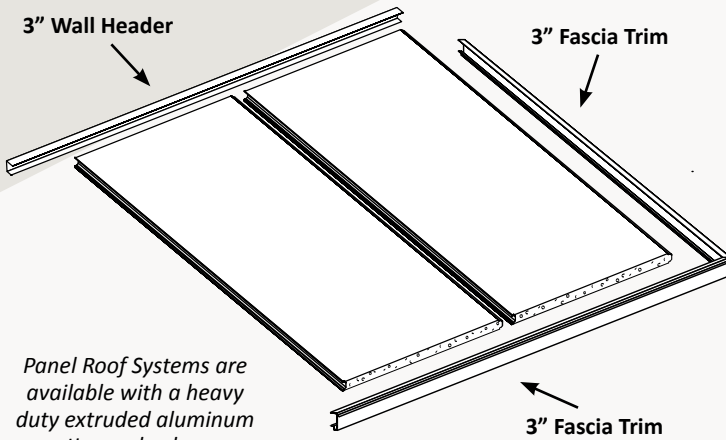

PermaWood Shade Structures are available in 5 colors: White, Spanish Brown, Sandstone, Adobe, and Desert Sand.

Aluma-Shield™ with Teflon® surface protector provides:

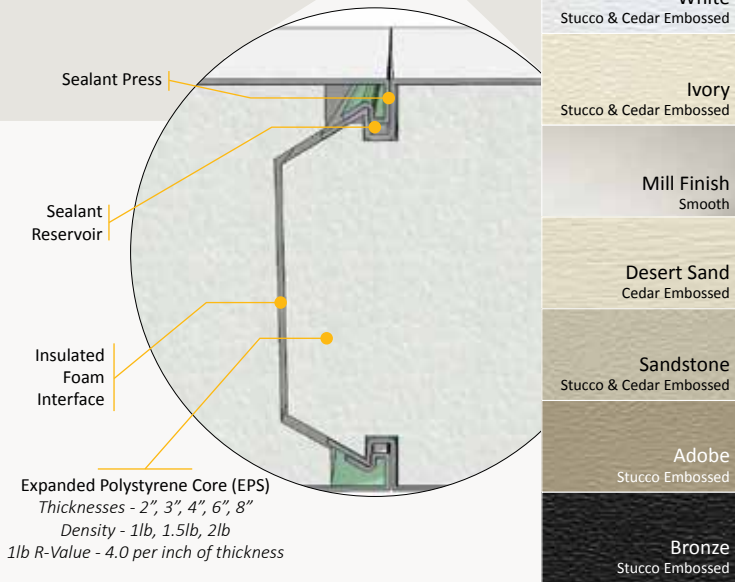

- Washability of a semi-gloss finish and decorative appeal of a matte finish.
- Surfaces that repel oil, dust, dirt, and stains - making them easy to keep clean.
- Protection from UV and weathering for a long-lasting, beautiful new look.
- Products that are resistant to corrosion from sun, salt, and pollution.
- A durable surface that resists chalking and fading.
- A premium coating without the premium price.
