

*Screen Glass Vinyl Patio*

# ENCLOSURES

EXTRA LIVING SPACE YOU CAN EASILY AFFORD

*Light Life Air Sunshine Nature*

## Increased Value

Adding extra living space to your home not only provides you and your family a better standard of living, but also increases the value of your home.

If you've ever considered adding a room to your house, you've also considered the time and costs involved. Using conventional construction methods can be quite expensive, time consuming, and often require the reconstruction of your home.

Structall Building Systems offers a unique enclosure system that can accommodate your needs. Maybe you want to convert an existing porch or patio into a screen

room or glass enclosure. You may wish to add-on a glass room or room addition. Since each and every enclosure we build is "custom-made," the possibilities are endless! Our unique pre-assembled wall units are built one at a time.

With the addition of our Snap-N-Lock™ Roof System, you could be enjoying your new enclosure in **a couple of days!**

*Above: This glass enclosure demonstrates the energy efficiency of the Snap-N-Lock™ Roof system.*

*Right: This two level enclosure features a screen room on the lower level and vinyl 4-track windows and trapezoids on the upper level.*

## Strength of Design

**With all the choices available to me, why should I buy a Structall Building Systems enclosure?**

- The tight joint connections of the Snap Wall System and the Snap-N-Lock™ Roof System are key to the strength and superior building performance found in every enclosure.
- In the 3" wall system, all windows & doors are recessed in the wall, instead of flush mounted, and have a complete, finished interior trim.
- All windows & doors are commercial rated, and are offered in a wide selection of options to fit your wants and needs.
- The choices for interior and exterior finishes are numerous. If your choice is aluminum, the panels will be manufactured with our exclusive Tuff-Kote Gold dual-layer paint finish. This premium finish resists scratching, corrosion, and fading.

*Above: Room layouts do not have to be rectangular. Design the room to suit your taste.*

**Left:** Windows let the sunshine in and leave the enclosure open and bright. Energy efficient enclosures can be air conditioned in the hot summer months, heated in the winter, and opened up to let in moderate breezes year round.

## Sun Breeze & Solaris

### Sun Breeze Edition

The Sun Breeze line is designed for those who wish to have the "feel of the outdoors" without having to deal with the harsh realities of Mother Nature. A screen room will allow you to experience the fresh air of a Spring rain, the Summer breezes without the insects, and the cool crisp winds of Autumn.

The other option in the Sun Breeze line is our Vinyl 4-Track window enclosure. Vinyl-film windows have stacking vents that open up to offer you 75% ventilation, but can also be closed to shut out the elements of nature. These unique windows have aluminum frames with vinyl-film vents. They are strong and durable, be it the heat & sun of Miami, or the cold winters of Canada. The vinyl in these windows will stretch when an object comes in contact with it, and afterward return to its original shape, good as new. Vinyl can be tinted in a variety of shades, and is an inexpensive way to upgrade a screen enclosure into a rainy day retreat.

**Below:** Sliding glass doors, horizontal sliding windows, and wall panels all work seamlessly together in this design.

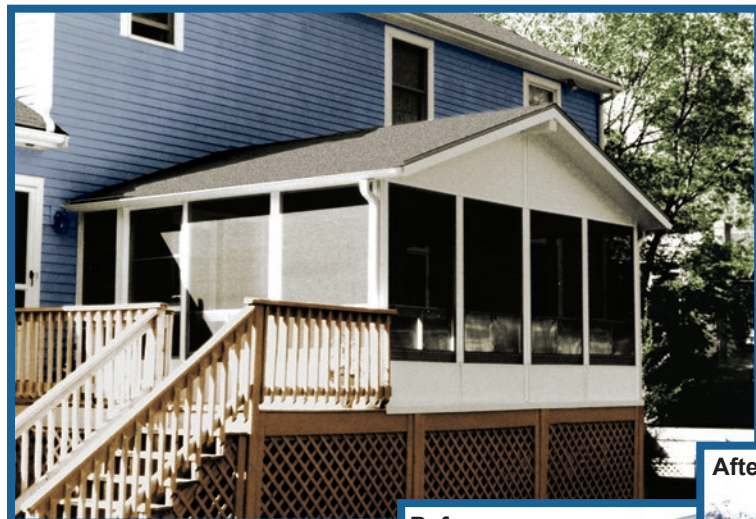

### Solaris Edition

For the most versatile enclosure, consider the Solaris Edition Glass Enclosure. Protected from all of the elements, the Solaris Edition allows you to turn your enclosure into a hobby room, den, office, or any activity room that you need to be protected from heat, cold, humidity, or any inclement weather.

Glass rooms blend in beautifully with your home, direct from the manufacturer with a little additional work from your contractor, your new glass enclosure will appear to be part of your home. Glass enclosures also offer higher entry standards for improved home security.

Whether you decide upon Sun Breeze or Solaris, you can enjoy the best of nature in the comfort of your own home for years to come.
