Enhance Your View With UltraScape

UltraScape allows you to enjoy your outdoor living space with fewer uprights for a better view.

UltraScape

Typical Cage

Why live with an obstructed view?
UltraScape allows for a wider span and spectacular views.

Maximum Durability

Keep your enclosure looking like new. Combine UltraScape with UltraScreen and UltraStainless for long lasting durability.

UltraScreen

Join the thousands of screen enclosure owners who have switched from decades old fiberglass mesh technology to **UltraScreen** - an insect screen that incorporates the latest in screen fabric advancements.

Ultra Screen is woven from a special polycore 420 denier yarn which - when co-extruded with a special PVC formulation - provides a far stronger and more durable screen porches in Florida that will withstand the elements far better than traditional fiberglass mesh.

- Approximately 40% **THICKER** than fiberglass screen
- Weighs 45% **MORE** than fiberglass screen
- Can withstand approximately 45% **MORE** tear force than fiberglass screen
- Maintains its strength and luster years after installation
- Backed by a limited 10-year warranty

Visit www.ultrascreen.us for more information.

UltraStainless

Protect all of your pool and patio surfaces from corrosive rust and choose UltraStainless fasteners.

- The only fastener offering a forever red rust warranty
- Cold forged for unmatched strength
- Architectural grade 304 stainless steel lasts indefinitely
- Multi-layer thermo-set coating process minimizes the behavior between dissimilar metals
- Available in head stamped concrete anchors, sheet metal screws and self tapping tek screws
- Available in both white and bronze

Visit www.ultrastainless.com for more information.
